Live from the Cape May Hawkwatch!
Week 6 Extensions

- **Science**: Northern Harriers exhibit sexual dimorphism, meaning the males and females have some different characteristics. Create a venn diagram to show the differences and similarities between male and female harriers.

- **Math**: Look at the Monarch data below. Which year had the highest number of monarchs? How about the lowest? The numbers are cyclical, with a mix of high low years. Calculate the approximate average number of Monarchs observed each year in Cape May.

![Monarch data chart]

- **Language Arts**: Monarchs spend the winter in Mexico, where the primary language is Spanish. Learn how to say some monarch-related words like “butterfly”, “caterpillar”, “migrate” and “flower” in Spanish.
Social Studies: Northern Harriers that nest in salt marshes are being affected by climate change. As sea levels rise, their low-lying nesting sites are more prone to flooding. What are 3 actions that you (your family, your school, etc.) can take to help reduce your carbon footprint and slow climate change?
